Walber Araújo

Senior Technical Business Analyst | Enterprise Systems | Systems Integration | Cybersecurity Operations | AI Automation | SAP | Power BI
New Westminster, British Columbia, Canada

Summary

Technical Business Analyst with experience supporting enterprise systems, operational workflows, and technical initiatives across public-sector and technology environments. My background combines business analysis, project coordination, systems integration, and technical operations, with hands-on experience supporting SAP enterprise environments, process optimization initiatives, operational workflows, and cross-functional collaboration between business and technical teams. Throughout my career, I have worked closely with stakeholders, end users, and technical teams to gather requirements, support system implementations, coordinate UAT activities, improve operational processes, and deliver data-driven solutions using Power BI, Python, Excel, Jira, and cloud-based platforms. In addition to business analysis and enterprise systems experience, I also bring hands-on exposure to cybersecurity operations, log analysis, incident investigation support, and AI-driven automation workflows involving APIs and LLM integrations. Key areas of expertise include:

- Technical Business Analysis
- Enterprise Systems & Systems Integration
- Requirements Gathering & Process Mapping
- UAT Coordination & Stakeholder Workshops
- SAP Enterprise Environments
- Power BI & Operational Reporting
- Cybersecurity Operations & SIEM Monitoring
- AI Automation & LLM Integrations
- Agile Delivery & Cross-functional Collaboration

Currently based in Vancouver, BC, and open to opportunities involving Technical Business Analysis, Enterprise Systems, Cybersecurity Operations, and AI-driven technical solutions.

Experience

avanzzada
Technical Analyst | Systems & Operations
December 2024 - April 2026 (1 year 5 months)

New York, United States

- Supported enterprise systems and operational environments by analyzing logs, troubleshooting incidents, and implementing technical improvements across Linux and cloud-based platforms.
- Collaborated with cross-functional teams to investigate operational issues, analyze system behavior, and improve platform reliability and performance.
- Performed log analysis and monitoring activities using AWS CloudWatch and operational tools to identify anomalies, support incident investigations, and improve response efficiency.
- Assisted in workflow optimization, technical troubleshooting, and documentation activities supporting production-grade systems and operational processes.
- Worked closely with technical and operational teams to improve system stability, streamline issue-resolution processes, and support continuous operational improvements.

Kordova Tek

Technical Analyst | Business Systems & Automation

October 2023 - November 2024 (1 year 2 months)

Vancouver, BC

- Collaborated with technical and business teams to translate business requirements into technical solutions and operational system improvements.
- Supported testing, validation, and troubleshooting activities for business applications and enterprise workflows.
- Assisted in the development of front-end and back-end solutions integrating AI APIs and LLM-based workflows.
- Participated in Agile ceremonies including sprint planning, backlog refinement, and cross-functional collaboration activities.
- Contributed to technical documentation, process improvement initiatives, and operational support activities across development environments.

- Supported analysis of system behavior, application performance, and operational workflows to identify optimization opportunities and improve user experience.

CHESF

10 years 1 month

Project Manager / Technical Business Analyst / SAP Key User
April 2018 - October 2023 (5 years 7 months)

Recife, PE

- Led enterprise system improvement initiatives involving SAP PS and operational workflows across a large public-sector energy organization.
- Facilitated requirements gathering sessions and collaborated with stakeholders, technical teams, and operational users to support system implementation and process optimization initiatives.
- Supported configuration and operational processes involving SAP PS, PM, FI, and CO modules, contributing to improved project control, budgeting reliability, and operational efficiency.
- Developed Power BI dashboards, Excel reporting solutions, and Python-based automations to support budgeting, forecasting, operational reporting, and executive decision-making.
- Improved budgeting and project-control reliability from 58% to 93%, supporting investment management initiatives exceeding \$1B.
- Conducted workflow analysis and business process improvement initiatives that reduced manual effort by approximately 1,200–1,400 hours annually.
- Supported UAT activities, validated system functionality against business requirements, and assisted with implementation and deployment activities.
- Created and maintained technical and business documentation including process flows, operational procedures, and implementation-related documentation for enterprise system initiatives.
- Delivered workshops and training sessions for more than 300 employees, supporting change management and enterprise system adoption initiatives.

- Coordinated with cross-functional teams, vendors, and operational stakeholders to support project delivery, system improvements, and continuous operational enhancements.

Construction Technician

October 2013 - November 2018 (5 years 2 months)

recife

- I worked on works for the Brazilian electric system. Where with major construction companies, I helped in the management, supervision of expansion projects and construction of new energy facilities, in several cities throughout the northeast of Brazil. Oct / 2013 - Jun / 2017.
- After this period I continued helping in the expansion works of the electric system in the project sector, supporting the project conference and developing models to measure the results achieved in the sector, helping to modernize the implementation, improvement and process control. Jul / 2017 - Nov / 2018.

Candidly

Full Stack Engineer

October 2021 - September 2023 (2 years)

New York, United States

Project Objective: Improve backend quality and ensure integration across multiple platforms to provide a stable and secure system for end users.

Duties Performed:

- Increased backend code coverage from 82% to 97% with PHPUnit, strengthening reliability and reducing system risk.
- Troubleshoot and resolved integration issues between React, Python, and Laravel platforms, improving interoperability.
- Developed protocols for ticket preparation and supported both technical and commercial discussions to align product requirements.
- Maintained documentation in JIRA and delivered presentations to improve team problem-solving practices.

Pernambuco Desenvolvimento Industrial

Construction technician

July 2012 - September 2013 (1 year 3 months)

Recife e Região, Brasil

Initially hired for inspection and control services of the concrete parts produced in the factory, participating in the entire construction process of precast concrete parts. Subsequently acting in the assembly of prefabricated parts on site customers, as well as their arrival schedule and assembly procedure with the teams in each customer.
